Results-driven Technical Lead with 13+ years of experience in web application development. Expert in Java 17, Spring Boot, and ReactJS, consistently delivering scalable, high-performance cloud-native solutions. Proven ability to lead and mentor teams (5-10 engineers), drive innovation, and optimize system reliability.

Experience

Technical System Analyst Staff

December 2017 — July 2025

Technical System Analyst at Juniper Networks leading full-stack development, cloud-native architectures, and team management for critical enterprise systems.

- Led a 10-member engineering team in designing and delivering scalable microservices.
- Championed critical system optimizations, achieving a 40% reduction in response times through Redis caching.
- Achieved 99.9% system uptime by successfully migrating legacy systems to AWS cloud-native architectures.
- Automated CI/CD pipelines with GitHub Actions and Terraform, resulting in a 75% reduction in deployment time.
- Proficient in ReactJS/NextJS for full-stack development and cloud-native architectures.

Senior Software Engineer

November 2016 — December 2017

Worked as a Senior Full Stack Developer, responsible for designing and implementing scalable web applications using modern frameworks and technologies.

- Designed and implemented scalable web applications using ReactJS and Spring Boot frameworks.
- Collaborated with cross-functional teams to deliver high-quality software solutions.
- Optimized application performance and ensured responsiveness across devices.
- Participated in code reviews and provided mentorship to junior developers.

Senior Software Engineer

March 2015 — November 2016

Developed and integrated the underlying logic for specific software components, ensuring robust and efficient functionality.

- Contributed to full-stack web development, focusing on JSP, Struts, and early Spring MVC.

Software Engineer

July 2011 — March 2015

Developed and integrated the underlying logic for specific software components, ensuring robust and efficient functionality.

- Contributed to full-stack web development, focusing on JSP, Struts, and early Spring MVC.

Projects

SWDL - Software Downloads

March 2023 — July 2025

Customer facing applications to help download software packages and updates through Juniper Single Sign-On (SSO).

- Facilitates legal and efficient software distribution by integrating with Juniper's internal systems for license validation and entitlement checks.
- Validates customer IP addresses to ensure compliance.
- Leverages Akamai CDN for accelerated content delivery.
- Includes robust logging and reporting of download activity for comprehensive auditing.

BAM

March 2022 — February 2023

Business Application Monitoring

- Provides real-time visibility and management of transactions across thousands of middleware interfaces (SAP, IBM, Oracle, Salesforce, etc.).
- Empowers business teams to monitor transaction health, performance, and reprocess failed transactions.

- Offers a unified dashboard for comprehensive insights.

IP Validation Service

March 2021 — February 2022

IP address lookup and Geolocation service for Juniper's customer-facing applications.

- Ensures legal compliance and regional access control by validating IP addresses against geolocation data (e.g., MaxMind DB) to identify origin and restrict access from embargoed countries.
- Provides real-time feedback to users.
- Integrates with all customer-facing applications for a seamless experience.
- All validation requests are logged and centrally monitored using the ELK stack for auditing and reporting.

Education

St. Xaviers - SXCCE, Anna University

January 2005 — January 2009

B.Tech in Information Technology

Certificates

Java SE 6 Programmer Certified Professional

July 2011

Oracle

Oracle Certified Expert, Java EE 6 Web Component Developer

August 2013

Oracle

Oracle Certified Expert, Java EE 6 Java Persistence API Developer

November 2013

Oracle

Spring Professional v5.0

July 2019

Pivotal Software, Inc

CKAD: Certified Kubernetes Application Developer

January 2020

The Linux Foundation

CKA: Certified Kubernetes Administrator

April 2021

The Linux Foundation

AWS Certified Solutions Architect – Associate

May 2021

Amazon Web Services (AWS)

CKS: Certified Kubernetes Security Specialist

December 2021

The Linux Foundation

LFCS: Linux Foundation Certified Systems Administrator

May 2022

The Linux Foundation

LFCA: Linux Foundation Certified IT Associate

February 2022

The Linux Foundation

Publications

Awards

Volunteer

Languages

English: Professional working proficiency

Tamil: Native speaker

Skills

Frontend: Expert-level ReactJS, JavaScript/TypeScript, HTML5 & CSS3, Tailwind CSS, NextJS, Redux, Jest, Cypress

Backend: Java, Python, GoLang, Spring Security, Spring Web, Service Discovery, API Gateway, Load Balancing, Circuit Breakers, Kafka, RabbitMQ, SQS, JUnit, Mockito, Spring Boot Test, PostgreSQL, MySQL, Hibernate/JPA, MongoDB, Redis

Cloud Platform (AWS): EC2, Elastic Kubernetes Service (EKS), Bedrock, Lambda, S3, SQS, SNS, Cloudwatch

Architectural & Design Skills: System Design, Microservices Architecture, Cloud-Native Principles, Domain-Driven Design (DDD), API Design, Enterprise Integration Patterns

DevOps & Automation Skills: CI/CD - GitHub Actions, Infrastructure as Code (IaC) - Terraform, Containerization & Orchestration - Docker & Kubernetes, Monitoring & Logging - ELK & Prometheus/Grafana, Scripting - Python/Bash

Interests

Sports: Cricket, Running
